OCTOBER PICTURE HIGHLIGHTS

FOREVER FIT: STRONG BODY & SOUND MIND

Age-related cognitive decline is a serious concern for many seniors. In addition to keeping a strong body, maintaining a sharp mind can greatly improve independence and over all well-being. According to the Mayo clinic, researchers have found that a third of dementia diagnosis are directly linked to modifiable risk factors. Adopting healthy habits early in life can help to lay the foundation for our cognitive wellness as we age. Regular exercise, healthy sleep habits, effective stress management techniques and healthy social relationships can all help minimize the risk for future cognitive struggles. Wellness has many dimensions, and maintaining a strong mind can help ensure that always up for the task.
